New Dimensions in Women's Health Linda Lewis Alexander,Judith H. LaRosa,Helaine Bader,2000 New Dimensions in Women's Health is a comprehensive overview of all major dimensions of women's health across the lifespan, providing various perspectives such as historical, epidemiological, sociocultural, and clinical issues for each topic. Data-driven chapters, with an emphasis on prevention and informed decision making, offer students broader sections of psychological dimensions, lifestyle and social dimensions, personal and sexual dimensions, and healthy dimensions for older women in order to create an effective style and structure for understanding the components of women's health.

Global Status Report on Road Safety 2015 World Health Organization,2015-12-17 The Global status report on road safety 2015, reflecting information from 180 countries, indicates that worldwide the total number of road traffic deaths has plateaued at 1.25 million per year, with the highest road traffic fatality rates in low-income countries. In the last three years, 17 countries have aligned at least one of their laws with best practice on seat-belts, drink-driving, speed, motorcycle helmets or child restraints. While there has been progress towards improving road safety legislation and in making vehicles safer, the report shows that the pace of change is too slow. Urgent action is needed to achieve the ambitious target for road safety reflected in the newly adopted 2030 Agenda for Sustainable Development: halving the global number of deaths and injuries from road traffic crashes by 2020. Made possible through funding from Bloomberg Philanthropies, this report is the third in the series, and provides a snapshot of the road safety situation globally, highlighting the gaps and the measures needed to best drive progress.--Publisher's description.

Hewett Cottrell Watson Frank N. Egerton, 2016-07-01 First published in 2003. Hewett Cottrell Watson was a pioneer in a new science not yet defined in Victorian times – ecology – and was practically the first naturalist to conduct research on plant evolution, beginning in 1834. The correspondence between Watson and Darwin, analysed for the first time in this book, reveals the extent to which Darwin profited from Watson's data. Darwin's subsequent fame, however, is one of the reasons why Watson became almost forgotten. This biography traces both the influences and characteristics that shaped Watson's outlook and personality, and indeed his science, and the institutional contexts within which he worked. At the same time, it makes evident the extent of his real contributions to the science of the plant ecology and evolution.

International Relations and States of Exception Shampa Biswas, Sheila Nair, 2009-12-16 Critically but sympathetically interrogating Italian philosopher Giorgio Agamben's analysis of the logic of sovereign power, this volume draws attention to the multiple zones of exclusion in and through which contemporary international politics constitutes itself. Beginning from the margins and peripheries of world politics, this book emphasises the colonial processes through which contemporary third world spaces of exception have been shaped and particular bodies made susceptible to the conditions of bare life. The authors contend that these bodies inhabit a variety of spaces or zones of indistinction that include political detainees, refugees, asylum-seekers, poor migrants, sweatshop workers, and unassimilated indigenous populations. These are the expendable bodies that the territorial and market-driven logic of current international relations simultaneously produces, polices and excludes. Focussing on the locally and socio-historically specific ways that sovereign power works, the individual chapters provide the volume with a wide geographical reach. Drawing on diverse approaches, this text constitutes an important intervention in critical international relations, providing grounded theory and sophisticated analyses of how contemporary international relations works through the production of 'exceptions'. Bringing together a range of internationally-renowned scholars, *International Relations and States of Exception* will be of vital interest to students and scholars of International Relations, Critical Theory and Postcolonial Studies.

A Policy Guide to Rental Housing in Developing Countries Alan Gilbert, 2007 Rental housing has remained a neglected area of national housing policy which has instead focused, often exclusively, on promoting home ownership. Consequently, rental housing has been overlooked with very few governments implementing any kind of policy to help develop or regulate this form of housing. Yet rental housing is a key component of a well-functioning housing market. While renting is not the panacea to solving the housing challenge in the developing world, it does constitute a significant and vital housing tenure option that should be promoted alongside, not in competition to, home ownership.

Here the male is supreme and the women required, even demanded, to obey them in every way. The few women who are allowed positions of authority are at times even crueller than the males! The story is told from the viewpoint of a resident, a visitor, a pony girl and one of women - who is finally arrested and falsely charged with possession which means she ends up in the same position as the hapless women she has happily caused suffering to!
