RFID for Libraries M. Paul Pandian, 2010-11-18 Many modern technologies give the impression that they somehow work by magic, particularly when they operate automatically and their mechanisms are invisible. A technology called RFID (Radio Frequency Identification), which is relatively new, has exactly this characteristic. Librarians everywhere are closely watching RFID technology. Advances over using bar codes on library materials, RFID tags are being touted as a way to radically redesign how library materials are handled. But it is expensive. The tags are vulnerable to wear and tear and the technology is not fully developed. It's unclear what sort of return on investment (ROI) it provides. While it is common for libraries to now have information technology expertise within their organizations, RFID may appear unfamiliar. **RFID for Libraries: A practical guide** examines what RFID technology is and how it works. The book reviews the development of computer technology and its effects on library operations over the last couple of decades. Further examination features the applications of RFID technology in libraries. An assessment of current implementations in libraries and the lessons learnt provides suggestions to overcome the issues faced. Concluding chapters look into the future to see what developments might be possible with RFID in libraries. Benefiting from the rich experience the author has gained during recent implementation of RFID based system for his library and the important title aids the library and information community in understanding RFID technology from a library perspective. Written by a librarian who has recently implemented the RFID system for his library Comprehensive review of available RFID systems for libraries Step by step guidelines for successful implementation of RFID systems in the library

Health Financing in Indonesia, 2009-01-01 In 2004 the Indonesian government made a commitment to provide its entire population with health insurance coverage through a mandatory public health insurance scheme. It has moved boldly already provides coverage to an estimated 76.4 million poor and near poor, funded through the public budget. Nevertheless, over half the population still lacks health insurance coverage, and the full fiscal impacts of the government's program for the poor have not been fully assessed or felt. In addition, significant deficiencies in the efficiency and equity of the current health system, unless addressed will exacerbate cost pressures and could preclude the effective implementation of universal coverage (Ue and the desired result of improvements in population health outcomes and financial protection. For Indonesia

to achieve UC, systems' performance must be improved and key policy choices with respect to the configuration of the health financing system must be made. Indonesia's health system performs well with respect to some health outcomes and financial protection, but there is potential for significant improvement. High-level political decisions are necessary on key elements of the health financing reform package. The key transitional questions to get there include: [the benefits that can be afforded and their impacts on health outcomes and financial protection; [how the more than 50 percent of those currently without coverage will be insured; [how to pay medical care providers to assure access, efficiency, and quality; [developing a streamlined and efficient administrative structure; [how to address the current supply constraints to assure availability of promised services; [how to raise revenues to finance the system, including the program for the poor as well as currently uninsured groups that may require government subsidization such as the more than 60 million informal sector workers, the 85 percent of workers in firms of less than five employees, and the 70 percent of the population living in rural areas.

The Electricity Grid in Indonesia K. Kunaifi,A.J. Veldhuis,A.H.M.E Reinders,2020-02-05 In 2017, nearly 60 million households in Indonesia were connected to the national power grid. Accordingly, we believe that their 'voice' is important to maintain democratic and participatory values in planning electricity services. However, what is actually the voice of electricity users in Indonesia? Also, what can we learn from it when looking at the fitness of the electricity supply in Indonesia in the context of costs, reliability, and environmental aspects? This book presents the real experience of households, some of the grid users in Indonesia. Through a series of surveys in 2017, households in three cities in Western, Central, and Eastern Indonesia shared their experiences and preferences regarding their electricity supply. They offered their opinions about the stability and reliability of electricity supply, how they coped with blackouts, and what impacts power interruptions had on their daily lives. Because of the frequent power outages, the users started to think about the importance of having a back-up power generator at home. Given that Indonesia has high solar irradiance the whole year through, we also observed the users' attitudes toward solar photovoltaic (PV) systems. The book starts with a brief introduction about Indonesia followed by the status and challenges of power supply in the country. Then, in the middle section, the users' voices are presented. Finally, the potential of PV systems, as a promising solution to increasing electricity access and improving the reliability of electricity supply in this tropical country, is presented. We believe that this book provides useful information for the transition to the use of solar energy in energy systems in Indonesia, which is meant for academia, electric utility companies, PV system actors, policymakers, and of course, households in Indonesia.

Innovative Infrastructure Financing Through Value Capture in Indonesia Asian Development Bank,2021-05-25 This report proposes a new method to increase infrastructure investment based on the concept of value capture in Indonesia. Indonesia needs significant additional infrastructure investment to sustain its economic growth. However, the COVID-19 pandemic has further limited the fiscal space of the government. The report studies how Indonesia's existing policies and

regulations can be used to build a value capture framework that ensures the maximization of the social, economic, and environmental value of infrastructure investments. The framework focuses on strategies to deliver infrastructure projects that create greater value and, at the same time, generate funding for up-front investment.

Growth Slowdowns and the Middle-Income Trap Mr. Shekhar Aiyar, Mr. Romain A Duval, Mr. Damien Puy, Mr. Yiqun Wu, Ms. Longmei Zhang, 2013-03-20 The “middle-income trap” is the phenomenon of hitherto rapidly growing economies stagnating at middle-income levels and failing to graduate into the ranks of high-income countries. In this study we examine the middle-income trap as a special case of growth slowdowns, which are identified as large sudden and sustained deviations from the growth path predicted by a basic conditional convergence framework. We then examine their determinants by means of probit regressions, looking into the role of institutions, demography, infrastructure, the macroeconomic environment, output structure and trade structure. Two variants of Bayesian Model Averaging are used as robustness checks. The results—including some that indeed speak to the special status of middle-income countries—are then used to derive policy implications, with a particular focus on Asian economies.

Collaborative Enterprise Architecture Stefan Bente, Uwe Bombosch, Shailendra Langade, 2012-09-01 Ever-changing business needs have prompted large companies to rethink their enterprise IT. Today, businesses must allow interaction with their customers, partners, and employees at more touch points and at a depth never thought previously. At the same time, rapid advances in information technologies, like business digitization, cloud computing, and Web 2.0, demand fundamental changes in the enterprises' management practices. These changes have a drastic effect not only on IT and business, but also on policies, processes, and people. Many companies therefore embark on enterprise-wide transformation initiatives. The role of Enterprise Architecture (EA) is to architect and supervise this transformational journey. Unfortunately, today's EA is often a ponderous and detached exercise, with most of the EA initiatives failing to create visible impact. The enterprises need an EA that is agile and responsive to business dynamics. Collaborative Enterprise Architecture provides the innovative solutions today's enterprises require, informed by real-world experiences and experts' insights. This book, in its first part, provides a systematic compendium of the current best practices in EA, analyzes current ways of doing EA, and identifies its constraints and shortcomings. In the second part, it leaves the beaten tracks of EA by introducing Lean, Agile, and Enterprise 2.0 concepts to the traditional EA methods. This blended approach to EA focuses on practical aspects, with recommendations derived from real-world experiences. A truly thought provoking and pragmatic guide to manage EA, Collaborative Enterprise Architecture effectively merges the long-term oriented top-down approach with pragmatic bottom-up thinking, and that way offers real solutions to businesses undergoing enterprise-wide change. Covers the latest emerging technologies affecting business practice, including digitization, cloud computing, agile software development, and Web 2.0 Focuses on the practical

implementation of EAM rather than theory, with recommendations based on real-world case studies Addresses changing business demands and practices, including Enterprise 2.0, open source, global sourcing, and more Takes an innovative approach to EAM, merging standard top-down and pragmatic, bottom-up strategies, offering real solutions to businesses undergoing enterprise-wide changes
