Corruption and the Management of Public Safety Simon Ashley Bennett, 2024-03-05 Graft is a common and persistent social pathogen that afflicts the developed and developing world in equal measure. This book describes, through the medium of international case studies, how graft undermines public safety and how, following a near-miss, incident or accident, investigators can use actor-network theory (ANT) to ascertain to what degree and through what mechanisms graft contributed to the event. The book introduces the reader to graft through a variety of case studies and explains how graft works against the public interest. The relatable case studies include the 1989 Hillsborough football stadium disaster, 2007 Adam Air crash, 2015-ongoing Volkswagen diesel emissions scandal and 2020 Beirut ammonium nitrate explosion (Lebanon). It demonstrates the threat graft poses to public safety, economic success and corporate and national reputation. By the end of the book the reader will understand the nature and extent of the problem of graft, how graft undermines safety, confidence and reputation, and how ANT can be used to identify and quantify graft in respect of the governance of

technological systems and to ascertain to what degree and through what mechanisms graft contributed to a near-miss, incident or accident. Primarily aimed at an academic audience, this book will offer essential insights to students, researchers and faculty within the fields of risk, crisis and disaster management, as well as corporate governance and safety. The accessible nature of the book will also appeal to safety practitioners, risk managers and accident investigators.

German Fire Engines Cristina Berna, Eric Thomsen, 2024-02-01 The Feuerwehr (German: fire defence) is a number of German fire departments. The responsible bodies for operating and equipping fire departments are the German communities (Gemeinden) and cities (Städte). By law, they are required to operate fire-fighting forces. In cities, this is usually performed by the Fire Prevention Bureau, one of the higher-ranking authorities. There are three kinds of firefighters in Germany: the predominant number of Germany's 1,383,730 firefighters are members of voluntary fire brigades (Freiwillige Feuerwehr), a lesser number are working in professional fire brigades and the smallest are the drafted members of a Compulsory Fire Service (Pflichtfeuerwehr), established just in a few places nationwide. Here we look at some of their flashy vehicles. We hope you will enjoy our selection of photos.

Visual Informatics: Bridging Research and Practice Halimah Badioze Zaman, Peter Robinson, Maria Petrou, Patrick Olivier, Heiko Schröder, 2009-11-14 Visual informatics is a field of interest not just among the information technology and computer science community, but also other related fields such as engineering, medical and health informatics and education starting in the early 1990s. Recently, the field is gaining more attention from researchers and industry. It has become a multidisciplinary and trans-disciplinary field related to research areas such as computer vision, visualization, information visualization, real-time image processing, medical image processing, image information retrieval, virtual reality, augmented reality, expressive visual mathematics, 3D graphics, multimedia-fusion, visual data mining, visual ontology, as well as services and visual culture. Various efforts have been invested in different research, but operationally, many of these systems are not prominent in the mass market and thus knowledge and research on these phenomena within the mentioned areas need to be shared and disseminated. It is for this reason that the Visual Informatics Research Group from Universiti - bangsa Malaysia (UKM) decided to spearhead this initiative to bring together experts in this very diversified but important research area so that more concerted efforts can be undertaken not just within the visual informatics community in Malaysia but from other parts of the world, namely, Asia, Europe, Oceania, and USA. This first International Visual Informatics Conference (IVIC 2009) was conducted collaboratively, by the visual informatics research community from the various public and private institutions of higher learning in Malaysia, and hosted by UKM.

The history of ambulances goes way back but the Spanish used them to carry wounded already in 1487 during the Siege of Málaga, part of the Reconquista. The U.S. Army started using ambulances in 1865 and soon after major cities like Cincinnati and New York City began using horse drawn civilian ambulances. Today, rescue vehicles are technologically highly developed with specialized equipment and specially trained paramedics to keep people alive until they can get care at a hospital. Seven Myths of the Russian Revolution Jonathan Daly, Leonid Trofimov, 2023-02-09 This fascinating volume is a major contribution to our understanding of the Russian Revolution, from World War I to consolidation of the Bolshevik regime. The seven myths include the exaggeration of Rasputin's influence; a purported conspiracy behind the February Revolution; the treasonous Bolshevik dependence on German support; the multiple Anastasia pretenders to the royal inheritance; the antisemitic claims about 'Judeo-Bolsheviks'; distortions about America's intervention in the civil war; and the 'inevitability' of Bolshevism. In each case the authors analyze the facts, uncover the origins of the myth, and trace its later perseverance (even in contemporary Russia). To assist readers, the volume includes three reference guides (people, terms, dates), nine maps, and twenty-nine illustrations. The result is immensely valuable for undergraduate courses in Russian history.
