Loving and Studying Nature Malcolm Skilbeck,2022-01-05 This volume investigates crucial ways in which nature has been apprehended, understood and valued in different cultures and over time. It is grounded in current global concerns about growing threats to the natural environment. Through a critical appraisal of specific examples, it ranges widely over historical and contemporary attitudes and behaviours. It presents a wide ranging analysis of selected ideas and attitudes in the evolution mainly of western civilisation, from the time of the cave artists to the present day. It argues for preservation and conservation of the natural resources and beauty of the earth in the face of religious supernatural arguments and the rise of consumer capitalism and consumerism.

Emotions in Europe, 1517-1914 Katie Barclay,François Soyer,2022-05-30 This four-volume collection of primary sources focuses on the history of emotions in Europe and its empires between 1517 and 1914. Arranged chronologically, each volume examines the subjects of the self, family and community, religion, politics and law, science and philosophy, and art and culture. The collection begins with the Reformation in 1517 as a key transformative moment in European history that required people to rethink the self, belief, and scientific knowledges – all of which shaped and were shaped by emotion. It ends with WW1, by which point psychology and modern frameworks for the self had become standard knowledges. In between, ideas and practices of emotion were not static, and part of the history charted across these volumes is the making of a new vocabulary for emotions and the self. Sources include letters, diaries, legal papers, institutional records, newspapers, science and philosophical writings, literature and art from a diversity of voices and perspectives. Accompanied by extensive editorial commentary, this collection will be of great interest to students of history and literature.

The NEW GOD PARTICLE and FREE WILL Leo Vuyk, 2008-09-30 Something SMALL is wrong with physics if we look at the Hubble images of our universe. This and other anomalies described in the book are a firm reason to suggest a PARADIGM SHIFT, which could lead to a TOE. (Theory Of Everything) I hope you will enjoy the reading of this book. HOWEVER I also hope that you will be able to grasp the speculative logic of my Goals of intelligent life postulation. Why? because: If we don't feed the have nots and keep them in endless poverty, the STP-ROM or Global (collective) consciousness around Mother Earth, which is supposed to be the base for all our dreams and intuition, will turn into a steep negative spiral. This could be the origin of a strong global hatred and the rise of fascist leaders.
